Professional Summary

Computer Science Engineering student specializing in **Java backend development**, microservices, and scalable distributed systems. Dual Oracle Certified Professional Java Developer (SE 11 & 17) with hands-on experience building Spring-based applications and RESTful services. Passionate about designing reliable backend systems and cloud-native applications. Seeking a PFA Software Engineering Internship in backend or Java development.

Education

ENSAH — National School of Applied Sciences, Al Hoceima 2022–2027 (Expected)
Engineering Degree in Computer Science (Engineering Cycle: 2024–2027)
Preparatory Classes for Engineering Cycle (2022–2024)
Relevant coursework: Advanced Algorithms, Advanced Java Programming, Software Architecture & UML, Advanced Database Administration, Computer Networks, Linux & System Programming.

Baccalauréat in Mathematical Sciences (French Option)

Technical Skills & Tools

Languages: Java, SQL, PL/SQL, Python, C++, JavaScript
Backend & Architecture: Spring Framework, Microservices, REST APIs, OOP, MVC, Layered Architecture, Maven, JDBC
Databases: Oracle Database, MySQL, MongoDB, SQL, PL/SQL
Cloud & Tools: Oracle Cloud Infrastructure (OCI), Git, Linux
Computer Science Fundamentals: Data Structures, Algorithms, Complexity Analysis, Problem Solving
AI / Data: Machine Learning, Data Processing

Experience

Web Development Intern — CodSoft, Remote Feb 2025 – Mar 2025

- Built and delivered **10+ web application features** using REST APIs and modern web technologies
- Collaborated with a distributed team using Git workflows and pull request reviews
- Applied clean architecture principles to improve code maintainability and modularity

Certifications

Oracle Certified Professional: Java SE 17 Developer

Oracle Certified Professional: Java SE 11 Developer

Oracle Cloud Infrastructure 2025 Foundations Associate

Git & GitHub Fundamentals for Developers

English for Career Development

Projects

InterviewAI — Java Desktop Application

- Designed layered architecture and secure BCrypt authentication supporting **multi-user workflows**
- Integrated REST APIs and MySQL database with optimized data access layer
- Built admin dashboard and gamification system improving user engagement
- *Tech: Java 17, JavaFX, Maven, MySQL, JDBC*

Africa Cup of Nations Predictor — ML System

- Built Random Forest model achieving **∼70%+ prediction accuracy** on match data
- Developed FastAPI backend and Next.js simulator for tournament forecasting
- Implemented Monte Carlo simulations to evaluate competition outcomes
- *Tech: Python, FastAPI, Scikit-learn, Next.js*

Languages

English (Fluent) • French (Intermediate) • Arabic (Native)
